Subject: Sampling at Falcon Refinery Superfund Site
Date: Tuesday, May 21, 2013 2:51:00 PM

Bob

Thank you for calling earlier. I would like to confirm that the sampling at the Falcon site will not start until the week of July 14. I have contacted the EPA Houston Lab and informed them that we will start field work the week of July 14. I will wait until I have received the update to the FSP before submitting a request for analytical work to the Houston Lab. I may need to request EA's support in completing the request. Based on our conversation, I will contact the new owner of the site to discuss obtaining a site access agreement. This may require a trip or conference call to the owner's office in Houston to explain the project and process. Can you please let me know your availability for a meeting or conference call with the new owner. I will be in all this week except for Wed afternoon the 22nd Friday the 24th.

Thanks

Brian W Mueller RPM
